Permanence of Cure the True Test.

Many so-called pile remedies will afford he user slight temporary relief and the najority of those afflicted do not expec-nore than this.

the user slight temporary relief and the majority of those afflicted do not expect more than this.

The average sufferer after having tried every preparation recommended for the cure of piles, comes to the conclusion that there is no cure except by an operation and rather than undergo this "last resort" he suffers on, resigned to the situation, so far as may be. The attention of those interested is invited to the following experience.

"After ten years of suffering from blind, bliedling and protruding piles and after using every remedy I could hear of without any benefit, I finally bought a fifty cont box of Pyramid Pile Cure and used it with such good results I bought next a dollar box, which finished up the job. That was nearly six years ago, and as far as piles is concerned I am cured, and have never felt a symptom of them since.

"Many others have used this remedy by my advice with the same results and falways recommend it to sufferers with piles." C. H. Potts, Burlington, Kans.

Testimony like this should convince the most skeptical the Pyramid Pile Cure not only cures, but cures to stay cured. It is in the form of a suppository, can be applied in the privacy of the home, directly to the parts affected and does its work quickly and painlessly.

Druggists generally, sell this famous remedy for fifty cents a package and sufferers are urged to buy a package now and give it a trial tonight. Accept no substitutes.

# THE VALUE OF CHARCOAL.

Few People Know How Useful it is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and Intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poleon of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other narmless antiseptics in tablet form, or rather in the form of large, pleasant tasying lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon tell in a much-improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffslo physician in speaking of the benefits of charcoal says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-fixe cents a box at drug stores, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."

#### THE APPENDIX AND APPENDICITIS.

Delton, Colo., Jan. 31, 1905.

To the Editor:

In your issue of Monday, Jan. 23, you publish a short article on the appendix in which some scientists had discovered some new economy for that Darwinian's grandparents' relict, as some would have it, but I think we can discover something nearer home than the above. Any person who goes through the world with his eyes open may see that every new born animal immediately after birth passes a large quantity of excrementatious matter long before any food passes the mouth and stomach; days, in fact. Now, I hold that the mother secrets a milklike substance and passes it, through the umbelical cord, through the appendix and into the lower bowels, and there it becomes digested for the feeding of the embryo two or three months before it is born and receives norulshment by the mouth.

It is well known that the colon is a real-

heard of animals dying of "appendicitis."

It is the human animal alone that is subject to this disease. The imbelicus is severed by torsion in the animal, and the

Murray Department.

At Tuesday's session of the city ouncil the Greek and Austrian saloon proprietors appeared to show cause why their liquor licenses should not voked. They professed ignorance of the city ordinance governing saloons, fter a severe lecturing from the different members of the council, they were each furnished with a copy of the ordinance and released, to conduct orderly houses in the fu-

The petition from the barbers of the city asking to have their licenses re-voked was granted. Tuesday was regular pay day for the city's employes.

TRUANT BOYS RUNAWAY.

Tuesday last Mape Sundberg, King Farrell and Art Meyers, three young boys about 12 years old, stole away from the Murray High school and boarded a south-bound freight train. That afternoon, after a lively ride on the bumpers, they landed in Provo city. The city marshal of that place hap-pened to see the boys hanging about the streets and surmising they were strangers took them in charge and placed thme in the city jail. The boys informed him they were from Murray, so the next day he wired their parents of their next day he wired their parents of their whereabouts. The marshal was instructed to purchase tickets for the boys with the exception of the Meyers boy, whose parents wired back to let him return the way he went. Wednesday night the train from the south stopped at the Murray station, and the two boys, whose fares had been paid, stepped off; they were greatly surprised to see their pal, the Meyers boy, crawling out from under the passenger coach where he had beat his way on the brake rods. The Meyers boy is out on brake rods. The Meyers boy is out on good behavior from the Reform school, and a few more tricks like this will be sufficient to send him back there.

STOLE BRASS. On Monday last Marshal Mauss was

informed by the superintendent of the local smelter that mischievous boys local smelter that nischlevous boys had ruined one of the engines in the old Germania plant. The boys had broken all the brass fixtures off the engine and sold them to a local junk dealer. Accordingly the marshal rounded up a half dozen boys, but on promise from the boys' parents to see that the boys were punished, the casewas dropped. Criminal proceedings was dropped. Criminal proceedings may be commenced against the junk dealer for receiving stolen property.
